### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

1. This communication is an Examiner's reasons for allowance in response to application filed on June 20, 2003, assigned serial 10/600,929 and titled "METHOD OF INPUTTING A DESTINATION INTO A NAVIGATION DEVICE, AND NAVIGATION DATABASE".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the prior art of record and the search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches a system and method of inputting a navigation destination into a navigation device associated with a navigation database which includes at least the steps of entering a place name of the navigation destination, and if there are a plurality of navigation destinations having the same place name, outputting supplement information for the plurality of navigation destination to allow differentiation of the navigation destinations in each case, wherein the supplemental information is the information regarding to at least one of direction and distance from at least one of a nearby prominent point or a nearest prominent point (claims 1 and 6). Also, neither references teaches "the supplemental information includes information about at least one of the direction and the distance from at least one of a nearby large city and a nearest large city.

Art Unit: 3661

c. The closest reference found was Yokota (6,687,613). Although Yokota discloses an apparatus and method is similar to the present invention, i.e. when the database has a plurality of the same place names (for example, "in-N-out burger" as shown in figure 5C), a supplemental information is outputted which regarding to the distance. However, such distance is referred to the distance from the places to the current position of the vehicle, which is not the same as the distance in the present invention. The distance or direction information (supplemental information) in the claimed invention is referred to the distance/direction between that place(s) to the nearby/nearest prominent point/large city as shown in figure 1.

d. Claims 1-7 are allowable over the prior art of record.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (703) 305-9755. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (703) 305-8233.

Any response to this action should be mailed to:
